- Technical & Product Presentations

More than
+ 100 exhibitors

Over **+5.000**
trade visitors

EXHIBIT PROFILE

Indonesia - your key to sales success. Construction Firms Find Strong Growth in East Indonesia (Surabaya as Indonesia 2nd Largest City)

Indonesia's emerging economy is in dire need of better infrastructure, while rising personal income is driving demand for residential and commercial property. These factors put the country squarely on the radar of the global construction industry. Indonesia's construction industry, already worth 10% of the country's massive GDP, will grow into one of the largest in the world in the coming decade. For suppliers, investors and exporters in every single sector of the building and interiors industries, the South-East Asian archipelago economy offers unequalled opportunities for short and long-term returns.

With a huge population nearly to 260 million, high infrastructure spending and rapid urbanization, Indonesia is developing at an unprecedented rate. High promising economic growth, and increasing demand for new and retrofit building offices and commercial buildings, the demand for lift & escalator products and technology is continue to growing.

- Complete Machine:
- Elevator
- Escalator
- Walkways
- Residential Elevator
- Stair Lift
- Lifting platform for disabled people
- Service Elevator
- Parking Facilities
