---

If Pakistan is to play its proper role in the world to which its size, manpower and resources entitle it; it must develop industrial potential side by side with its agriculture and give its economy and industrial basis. By industrializing our State, we shall decrease our dependence on the outside world for necessities of life; we will give more employment to our people and will also increase the resources of the state.

On the occasion of laying the foundation-stone of the building of the Valika Textile Mills Ltd. on 26th September, 1947 [www.quaid.gov.pk/speech08.htm](http://www.quaid.gov.pk/speech08.htm)

**Government of Pakistan**

---

It is a great pleasure to note that 'Build Asia International Exhibition & Conferences' is being held for the 15th consecutive year in Karachi. The event having been consistently held annually has now turned into the Biggest Construction Industry in Pakistan.

This platform provides foreign investors to look into the many opportunities available in the country, as various new horizons are opening for Pakistan.

The Government is playing a very active role by launching new mega projects of bridges, flyovers and roads infrastructure in Karachi including the Green Line Bus Service that will provide job opportunities as well as facilitate the public transportation in the metropolitan city.

I would also like to highlight that Karachi is the financial hub of the country and is ranked amongst the top 10 cities of the world in terms of population. The construction industry plays a major role in boosting the economic stability by adding a variety of projects, which are the need of the hour.

In the end, I would like to extend my heartiest greetings to Ecommerce Gateway Pakistan for successfully organizing 'Build Asia International Building Materials & Construction Machinery Show'.

I fully extend all possible support for the successful conduct of this event and its future outcomes.

**Government of Sindh**

---

It is great pleasure to know about the conduct of the Biggest Construction Industry Event of Pakistan – Build Asia International Exhibition being held for 15th consecutive year in Karachi. I would like to state that the vision of our Construction Industry is developing day by day through innovative ideas.

The Government of Sindh has launched the biggest infrastructure road projects in Karachi like the “Malir Expressway” and “Link Road (N5-M9)” for facilitating heavy traffic as well as several other projects including “K-IV” and other mega sewerage projects. We are also working to develop and promote investment friendly environment that boosts economic activity which brings value addition to all the sectors of economy and encourages Public Private Partnerships for Socio-Economic development in Sindh.

This Exhibition shall bring a lot of International Brands from different regions that help them to explore the Pakistan market, specially Sindh and in return our trade opportunities and economy increasing in the Pakistan day by day.

I ensure full support to Ecommerce Gateway Pakistan (Pvt.) Ltd from the Government of Sindh wish 15th Build Asia International Exhibition and Conferences tremendous success.

**Mr. Mohsin Sheikhani**

**Chairman**

**Association of Builders and Developers of Pakistan (ABAD)**

---

Pakistan real estate market is growing in a positive direction due to the improved security situation in the country leading to increased foreign interest and investment which can be seen in projects such as the China and Pakistan Economic Corridor (CPEC). The market is full of investment opportunities as Gwadar is great example of investment hot spots right now.

ABAD has in its fold more than 1000 leading construction companies of the country. Most of its members' offices are equipped with up-to-date systems of designing, cost control, project management and latest civil engineering techniques to minimize the cost of construction. The major achievements of ABAD include increasing the covered area of flats, fixation of the selling price of housing units, inclusion of a provision of escalation, simplification of the procedure for the permission to mortgage and registration of leases, increase in the period of completion and streamlining of documentation procedures regularly. The main objectives and goals that we are following on the Promotion of housing industry in the country, awareness and training program to promote the science and art of building. We are actively working to eliminate unethical business practices in housing and development and explore the prospects of large-scale projects in the public sector.

Build Asia International Building Materials & Construction Machinery Show highlight the importance of construction industry and strengthening the economy of Pakistan and also proved that the corporate sector of the country is vibrant and the economy of Pakistan is moving in the right direction which shows for the government that the future of the construction industry as well as Pakistan's economy is very bright.

I congratulate Ecommerce Gateway Pakistan for organizing the 15th Build Asia International Building Materials & Construction Machinery Show 2019.

**Jawed Saleem Qureshi**  
**Chairman**  
**Pakistan Engineering Council**

---

I am very pleased to know that Build Asia is going to organize the 15th International Exhibition and Conference on Building Material and Construction Machinery on 14-16 December 2019 at Karachi. I would like to congratulate the organizers for highlighting this important area and providing a platform to the stakeholders including engineers, technologists, consultants, contractors, entrepreneurs, builders, people of allied professions, policymakers, and researchers to network with each other, share their knowledge, experiences, and concerns, and get cognizance of the latest technological development in the construction equipment, materials, and services.

Construction industry is one of the key drivers of the economic growth of Pakistan; such exhibitions and conferences are very significant in acquainting the stakeholders of the industry of modern technical and technological developments in this field.

Construction industry is the second largest sector after agriculture which is playing a pivotal role in the economic development of the country by cultivating enormous employment opportunities for the skilled and unskilled labor force. In Pakistan, there is a huge potential in construction and building material industry, however owing to challenges of saturated marketplace, design complexities, shortage of skilled labor, and sustainability concerns, this industry is at the crossroads. To overcome these challenges and enhance the capacity of the industry, the induction of latest and smart construction technology in terms of its design, structures, and performance is paramount for the uplift of this sector.

**Mr. Muhammad Asadullah Khan**

**Chairman**

**Constructors Association of Pakistan (CAP)**

---

The event includes a high profile conference to provide a platform for contractors, engineers, builders, consultants, government officials, bankers, policymakers, stakeholders, other practitioners & professionals of this industry.

The construction sector plays a major part in the economic increase and uplift of a country. It is an important employment generating Industry and offers job opportunities to millions of skilled and un-skilled labor forces. It is the second largest sector, after agriculture, in creating employment. To enhance the capacity of the Construction Industry of Pakistan, induction of latest and good condition construction machinery and equipment is the foremost requirement.

Recently a delegation of Constructors Association of Pakistan, met with Prime Minister Imran Khan. The delegation appreciated the vision of the Prime Minister in approving the construction sector as 'industry' and the steps being taken by the present government towards meeting the existing demand for low-cost housing in the country. While briefing the Prime Minister about the issues being faced by the constructors, the delegation proposed various steps to address these issues. The Prime Minister welcomed the suggestions and observed that the present government is committed to provide an enabling environment to the construction industry. The Prime Minister directed to formulate a construction development policy for facilitating all stakeholders including contractors, clients and consultants.

Over the past 14 years, this mega event has successfully provided valuable opportunities to overseas exhibitors and a platform for foreign investors to interact with local entrepreneurs for joint ventures, transfer of technologies and appointing agents, distributors and partners in Pakistan. Thus, Pakistan has gained the stature of an attractive destination for investors.

I would like to congratulate and wish good luck too Ecommerce Gateway Pakistan for organizing the mega Building materials and construction machinery exhibition, 15th Build Asia International Exhibition, 2019.

It is indeed heartening to note that Build Asia International Exhibition is being held for 15 consecutive years. We are proud to be associated as Strategic Partner with this leading Construction Industry Exhibition.

#### **Ecommerce Gateway Pakistan (Pvt) Ltd**

---

Ecommerce Gateway Pakistan proudly announces the 15th edition of Build Asia, International Building & Construction Exhibition incorporating Stonefair Asia, Wood & Furniture Asia, Glass Doors & Windows Asia and Hardware & Tools Asia. Our team shall continue to contribute towards the growth and development of trade and industry in all the leading sectors of Pakistan, thus strengthening the economic condition of the country. It is worth mentioning that B2B events that are organized by Ecommerce Gateway Pakistan are of such repute & caliber that play a pivotal role in projecting Pakistan as a moderate and progressive country, globally.

The objective of 15th Build Asia International Exhibition 2019 is to develop the domestic construction industry by introducing world class products, services and state of the art technology. Participants at this exhibition will be able to view all aspects in construction and infrastructure development, including even the smallest component to the heavy machinery and equipments and gain substantial knowledge and awareness.

15th Build Asia International Exhibition 2019 will bring together leading Builders & Developers, Architects, Engineers, Contractors, Consultants, Interior Designers and among many others. The participation of more than 400 Foreign and Local Companies depicts the potential of Pakistan's Construction and its Allied industries. Pakistan's construction industry is expanding at a fast pace and playing a vital role in the socio-economic development of Pakistan.

I would also like to take the opportunity to deeply appreciate the support of Ministry of Industries & Production, Government of Pakistan, Trade Development Authority of Pakistan (TDAP), Government of Sindh, Karachi Chamber of Commerce & Industry (KCCI), Constructors Association of Pakistan (CAP), All Karachi Marble Industry Association (AKMIA), Pakistan Stone Development Company (PASDEC), All Pakistan Marble Industries Association (APMIA), Pakistan Engineering Council (PEC), and also to our knowledge partner Sir Syed University of Engineering and Technology (SSUET) for organizing the conferences.

I hereby take immense pleasure to welcome all the Foreign and Local Delegates, Investors, Entrepreneurs, Exhibitors and Visitors to the Event and assure you of full cooperation and support from the organizers.

Capitalizing on our advanced infrastructural amenities, 5 Star Mining has arisen as an industry leader associated with the production of a broad range of Fly Ash and other cementing supplements. The extensive range at 5 Star Mining encompasses Slag GGBS, Fly Ash Loose, Micro Fly Ash, and Ultra-Fine Micro Fly Ash. 5 Star Mining is an extended branch of the Sadik Group. We are an evolving manufacturing and processing unit for the past three years. We own a processing unit at Port Qasim, Karachi, which is spread across 47500 sq. meters and another one at Raees Goth, Karachi, which is spread across 4750 sq. yards. Both of our units cater diverse needs of a wide range of supplies pertinent

to cement, ready-mix concrete, and cement pipes of our industrial clients all across Pakistan and mainly in Karachi, Hyderabad, and Matyari, Sindh.

Akhuwat Foundation has adopted over 300+ non-functional government schools to undertake the responsibility of delivering this all-rounded education. One such school is NJV Government Higher Secondary School, whose history dates back to over 170 years. Established in 1855, it is Sindh's oldest government school and started off with a total strength of sixty-eight boys which has now increased to a total of about 1300 students studying from Kindergarten to Grade 12. Akhuwat adopted the school in 2015, with the objective to restore it to its original grandeur, and make it a platform to serve and uplift the underprivileged community.

Product Line : Self Loading Truck Crane

H.C.E. is an Italian leader in the production of truck cranes, at worldwide level among the companies operating in this specific sector. H.C.E. began its activity in 1980 in Castelnovo di Sotto (Reggio Emilia - Italy); since 2000 the registered trademark holder is located in the new factory at Poviglio (Reggio Emilia).

As an emerging company, H.C.E. specialized the production of hydraulic cranes. Soon after, owing to its entrepreneurial capacity, H.C.E. has been able to establish a truly qualified group, unique in Italy as to articulation, productive strength and technological innovation.

Presently the H.C.E. group includes seven companies, suitably interfaced but still preserving their own operational independence.

The respect of the environment and the personnel safety is one major concern of H.C.E.; to this purpose impressive investments have been made in equipment that aim at damping the polluting agents and reducing risks.

H.C.E. has always accepted the market challenges and counted on innovation and quality, by giving space to new forces and young ideas inside the company.

Apex Machinery is authorized dealer in Pakistan.

Stall No(s) : A-47  
Product Line : Piling equipment

Apile Foundation was founded in 2006. It is a high-tech manufacturing enterprises. That is owning intellectual property rights and specializing in geological drilling, geotechnical drilling and excavation engineering, large caliber foundation construction, deep foundation pit support, environmental geological engineering and others disciplines and fields of new technology, new equipment, new apparatus and new technology research and development, production, Sales and trade integration.

Our company have developed the casing rotary drilling rigs, casing oscillators (Occlusal pile machine), double-wall casings(single-wall casings), the Punching cones, pile drivers, piling tools, compaction piling tools, expanding bottom piling tools, casing-auger piling tools, desanders and other products, that is obtained many national patents and has been able to produce and supply in batches. The technical and quality are up to the international advanced level.

Apile Foundation Focus on the technical exchanges and cooperation With domestic and foreign equipment manufacturers, traders, construction enterprises and professional associations, and maintain close, good relations of cooperation. The products had exported to the United States, Germany, Canada, Turkey, the United Arab Emirates, Russia, Kazakhstan, Southeast Asia and other countries and regions.

Product Line : Geomembraine, PVC Flooring, PV Chemicals

Established in 1968 by Mian Nisar Elahi (Late), ATS was created to spearhead Pakistan's industrial drive beyond typical textile business. By introducing materials with countless applications in modern life, our vision was to create world -class business to reduce dependency on import and raise performance in the sector.

Today that vision has been realized. ATS Group stands tall as the Pakistan's largest and the fastest growing industrial concerns. Specializing in synthetic leather our portfolio also takes in intermediate/specialized chemicals, plastics films/ technical products and textiles. These products touch people's life; from textiles that clothe and protect us to synthetic leather that enhance enrich quality of life, ATS products are fundamental to the quality of life.

At ATS we continue to build our strength: our commitment to quality, our proximity to markets, our investment in R&D and acquiring new technologies. The Group employs over 3,000 people; with the combined energy, drive and a spirit of collaboration we are building our future.

**With over 40 years of experience the name "ATS" is synonymous with expertise, innovative power and absolute reliability**

ATS synthetic is a member of ATS Group, started operations in 1968 with the aim to produce high quality coagulated synthetic leather. High quality standards as well as the aesthetic identity of the materials have helped the company to create products which are easily identifiable. ATS is now a market leader in the industry and is recognized as "The Best" in terms of production capacity, technology and product development and a stable supplier to meet the demands of synthetic leather market. ATS leather is the essence of shoe, soccer ball and sports goods industry and is playing a vital role in boosting exports of Pakistan.

## **Exhibitor's Profile**

### **ATS SYNTHETIC (PVT) LTD.**

Standing firm in production of synthetic leather we expanded operations in the field of plastics. Applications range from High tech membranes to complex pharmaceuticals grade films. As the development and system partner and become even closer to our customers we also invested in chemical sector. Initially started from production of wide range of plasticizers for wires, shoes and plastic industry, today ATS chemical division produces Polyurethane resin, high quality Heat Stabilizers & Paint Driers.

At ATS we continue to look to the future, for the good of our customers, for the well being of people and for the benefit of our environment.

#### **Products Range**

##### **Geomembrane**

- PVC Geomembrane
- HDPE Geomembrane
- LDPE Geomembrane
- GeoTextile
- Major Projects

##### **Synthetic Leather Division**

- PVC Synthetic Leather
- PU Synthetic Leather

##### **Plastic Division**

- PVC Films & Sheets
- PVC Flooring & Floor Material
- PVC Print / Lamination / Embossed
- PVC Rigid Film
- PVC Flex Vinyl

##### **Chemical Division**

- Plasticizers (DOP, DOA, TOTM)
- PAKTHANE (Polyurethane)
  - Polyurethane for Footwear
  - Polyurethane for Construction
  - Polyurethane for Sports Goods
  - Polyurethane for the Automotive Industry
  - Polyurethane for Refrigerators & appliances

## **ATS SYNTHETIC (PVT) LTD.**

- Speciality Chemicals
- Poly Driers
- Poly Stab for PVC
- Kickers for PVC Leather

### **Geomembrane**

Geomembranes liners play a vital role in curtailing the Water Loses in various spheres including Dams, Canals, Reservoirs, Waste Water, Agriculture, Irrigation and Civil Engineering to include Buildings and Tunnels etc. Geomembranes are devided into two major products basically on different characteristics and applications i.e PVC Geomembrane & HDPE Geomembrane, Produced by using state of the Art Production lines and virgin materials to meet ASTM Standards.

ATS Synthetic (Pvt) Ltd. is pioneer in producing quality of wide range of PVC Products and the sole Manufacturers of PVC Geomembrane & HDPE Geomembrane qualifying international standards, The most trusted name in the Pakistan.

ATS Synthetic (Pvt) Ltd. has a vast and rich experience of meeting Customer's demands besides remaining abreast with the latest Development world over affecting changes through constant R&D.

### **What is Geomembrane**

**“An essentially impermeable barrier used with foundation, soil, rock earth as an integral part to control fluid or vapor in a man-made project, structure, or system”**

### **HDPE Geomembrane**

High Density Polyethylene (HDPE) Geomembrane liners are used in a wide range of containment applications. Available in smooth, textured, white, conductive and high temperature variations, this material provides excellent durability and chemical resistance properties and is reliable in exposed applications, offering great ultraviolet protection and ageing resistance from the intense stresses of weather.

HDPE Geomembranes are available in a variety of surface finishes including textured, smooth and conductive. Textured finishes provide higher friction angles to prevent slippage of adjacent materials when lining steep slopes while smooth Geomembranes are the preferred products for lining projects requiring low permeability.

## **Exhibitor's Profile**

### **ATS SYNTHETIC (PVT) LTD.**

#### **LDPE Geomembrane**

Low Density Polyethylene (LDPE) Geomembranes provide much of the same durability and resistance properties found in High Density Polyethylene (HDPE) Geomembranes, But with the added benefit of increased material flexibility because it is a Lower-Density polymer. This gives Geomembranes the ability to conform to irregular surfaces, offers greater resistance to stress cracks and facilitates easier welding.

This increased flexibility makes Geomembranes well suited to pre-fabrication into large panels, minimizing field work. Additionally, it is often used in applications where long-term large settlements may be anticipated, such as landfill covers.

ATS offers Geomembrane installation, design assistance, fabrication and construction services for containment applications.

#### **Applications**

As liners for potable water

As liners for reserve water (e.g., safe shutdown of nuclear facilities)

As liners for waste liquids (e.g., sewage sludge)

As liners for secondary containment of underground storage tanks

#### **Plastic Division**

##### **Our passion for innovation enables us to open minds and action new ideas...**

Plastic division consists of manufacturing of high quality plastic films and associated products for technical applications. Imagination, Experience and Innovation are the roots of ATS plastic division. We have earned reputation as the most innovative company for PVC products. Goods are developed from top quality materials, latest design trends and impeccable standards. Providing our customers with superior expertise and variety, our products are sold in nationwide and internationally making us the largest producer of PVC film in Pakistan.

PVC Films & Sheets

PVC Flooring & Floor Material

Print, Lamination, Embossed Films

PVC Rigid Film

PVC Flex Vinyl

#### **Synthetic Leather Division**

##### **We create materials that make life richer, innovative and convenient...**

ATS Synthetic Leather Division, we produce technical and decorative surface materials from a wide variety of synthetics for Footwear, Automotive, Furniture

## **ATS SYNTHETIC (PVT) LTD.**

and Sports goods application, As we go about our work we focus on the demands of our customers and on the desires of the consumers. We seek out new Trends that allow us to develop high quality, contemporary materials. Every product we make is top quality, highly functional and expresses a positive quality of life.

Designs by ATS have a unique capacity to deliver the aesthetics and feel that consumers desire as well as the durability. All this is made possible by our technological expertise in the materials and precise knowledge of components.

### **Chemical Division**

#### **From Synthetic Leather to Fine Chemistry...**

Chemical Division was formed in 1999 with the spirit “if you want a good thing welldone, do it yourself”. The outcome was minimized dependence and eventually even better holds on quality and service. Plasticizers produced are consumed in-house for PVC leather / films. Flourishing start in chemical manufacturing, capacity is enhanced to cater the needs of local as well as international market. Wide ranges of plasticizers are introduced specifically for rubber, electrical wires, shoes, inks, coating, pipes and numerous other application in plastic industry. Designed capacity of over 50,000 TPA the superior technology added with greater expertise of our team makes our plasticizers best in the market in terms of quality, clarity and purity.

Progressing in chemicals we have integrated our PU Leather Division by setting up manufacturing facility to produce Polyurethane resin. Polyurethane resin is used in-house for the production of PU Leather, specific grades for footwear, textiles and apparel, packaging, building and construction applications are also produced.

ATS strives to understand customer requirements and develop new products, access new technologies to deliver successfully to its customers. ATS has developed itself as a high-tech company to respond to growing and evolving Global demands.

### **Company Philosophy**

#### **Tomorrow's progress stems from today's innovation ...**

Investment, innovation, flexibility – these are pivotal in ATS evolution. They give our business shape, Momentum, renewed focus.

By maximizing the skills and potential of our people, by listening to our customers as their suppliers of choice by improving our market insight and our technological acumen, and by investing in quality and innovation we are a equip ourselves to cater growing and evolving Global demands. This process is without limits.

## **Exhibitor's Profile**

### **ATS SYNTHETIC (PVT) LTD.**

Our strategy for growth is based on technology and R&D. As we built our achievements, we continue to set the highest quality and ethical standards, focusing on safety and well-being at every level of our operations.

As we look to the New Horizons and fresh challenges, it is our people and products, our values and heritage and our commitment to serving the changing needs of the world around us which offer a guiding hand into the future.

#### **Quality Control**

##### **With ATS you will benefit from expertise in design, service and quality...**

At ATS we maintain the concept of total quality. Organizing procedures and sophisticated technical instruments are appropriately integrated. Professionals in this team and quality inspectors aim to embrace proactive approach within each stage/process of production. Every production batch is always tested in order to verify the overall quality related to the destination of the product.

To further enhance our quality we are a member of Technology UK, the worlds leading research and technology organization for footwear and leather. We are in an ongoing agreement with SATRA for technical assistance. Our QC lab is equipped with SATRA testing equipment and many other testing tools such as tear/tensile test machines, UV test, Incubator, viscosity meter, abrasion testers, density scales, spectrophotometers; flame test, anti-fungus tests, bally and vamp flexometer with temperature control feature.

#### **Research & Development**

##### **We Create Your Imaginations...**

Innovations are no end in themselves for ATS. When it comes to developing materials we are the perfect partner. With ATS you will benefit from our expertise in design, service and quality. As the development and system partner we are able to contribute value in the discussions with our clients. The ideas we deliver help shape final product. As a leading innovator we possess a wealth of processes and knowledge that gives our customers the edge along the value chain from delivering innovative ideas right up to production maturity. We meet high quality demands of the industry with ongoing Quality Assurance standards.

Our latest developments many of which are unique exemplify or approach. In the industry new trends to enhance life are continuously emerging and we are quick to respond by offering our customers the innovations they need. With materials with high mechanical properties than any other producer we make a major contribution to brand loyalty.

Pakistan's Largest Manufacturers of  
**PVC & HDPE GEO-MEMBERANE**

The **Perfect Solution**  
for Preventions of  
**Seepage Losses**

**Geo-Membrane,**  
a perfect and  
impervious  
barrier  
against  
water seepage  
for different  
sectors

#### **MULTIPLE APPLICATION**

- ▶ Flood Embankment Protection
- ▶ Reservoirs & Lakes Lining
- ▶ Water Course & Water Storage
- ▶ Molasses Storages Ponds
- ▶ Wastewater Treatment Ponds
- ▶ Oil & Gas Pits
- ▶ Evaporation Ponds & Lagoons
- ▶ Landfills & Biogas Digesters
- ▶ Roof Gardening / Waterproofing
- ▶ Shell Roof water proofing
- ▶ Basement & Retaining wall
- ▶ Floor & Foundations
- ▶ Tunnels & Underpass
- ▶ Canals & Drains Lining
- ▶ Dams & Hydropower Lining

#### **ADVANTAGES**

- ▶ Prevents Water Seepage
- ▶ Extremely Cost Effective
- ▶ Highly Efficient
- ▶ Highly Flexible
- ▶ Puncture Resistance
- ▶ Long Life
- ▶ Good Mechanical Strength
- ▶ Ease of Molding or Shaping

ATS is producing Geo-Membrane from 0.25 mm ~ 3.00 mm thickness,  
with upto 132 inches according to PGI & ASTM standards.

Product Line: Construction Chemicals

During our business life span of over 39 YEARS, CAPITAL SEALERS & CO had been facing problems in acquisition of quality materials especially for re-habilitation works. The management of CAPITAL SEALERS & CO decided to acquire quality products from well established, renowned and certified manufacturers at affordable price. After having extensive brainstorming and interaction with different manufacturers around the globe, the management decided to have European brands which are well matured and have reputation all over the world. Keeping in view the quality and pricing, we decided to go for ISOMAT S. A. GREECE. The company has EN certification and presently is supplying the construction chemicals all over the World

Our Principal ISOMAT S.A GREECE is an R&D Company & produces over 370 construction chemicals, broadly classified into following nine categories.

- Waterproofing Materials.
- Concrete & Mortar Admixtures.
- Repairing & Rehabilitation Materials.
- Structure Strengthening with Carbon Fiber Strip & FRP Wrapping.
- Polyurea & Polyurethane for steel & concrete structures
- Polyurea & polyurethane Floorings.
- Epoxy floorings
- Industrial floors repairing chemicals.
- Tile Adhesive & Grouts

CAPITAL SEALERS & CO has the honour for us to provide the latest and long lasting solution to any kind of leakage / seepage and strengthening to any kind of structure over or underground throughout Pakistan with on job training to the individuals involved.

Product Line : Wheel loaders, Motor Graders, Soil compactors, Tract Type Tractors

Caterpillar (Qingzhou) Ltd located at Qingzhou China, is a wholly-owned subsidiary of Caterpillar. As one important strategic utility product brand of Caterpillar, SEM has its own brand proposition, distribution channels, marketing strategy and product support.

The SEM brand of compact, small and mid-sized wheel loaders, 18- to 22-ton soil compactors, mid-sized motor graders, track-type tractors, and landfill compactors are targeted at utility customers for Chinese domestic and growth markets around the world. SEM products meet or exceed regional industry requirements for quality and reliability and target customers who emphasize initial acquisition cost over long-term total cost of ownership.

By leveraging Caterpillar product development processes and legacy technology, Caterpillar (Qingzhou) Ltd. is providing quality ready-to-run SEM products offering initial affordability, high reliability, simplicity of use and maintenance, and responsive support to help customers build a strong foundation for future success.

Apex Machinery (pvt) Limited is the authorized exclusive SEM Products dealer in Pakistan.

Designation : General Manager  
Cell : +92-3164535312  
Stall No(s) : B-40  
Product Line : Thermal Insulation Boards

Having freshly ventured into the industry, Crown Thermal Insulation Company oozes confidence and the urge to grow and develop briskly. Managing team of organization boasts of highly qualified and experienced devotees with a pedigree of business enterprise and venturing. Mr. Mingyang took responsibility of being the Director of company. Dr. Younas, on the other hand, is General Manager of the company, overlooking the day to day operations of the Company. CTIC is the first international Thermal Insulation board manufacturer of world class high quality in Pakistan.

Insulation materials are used during construction of buildings and are placed between two layers of the roofs. Through its reflection qualities, this reflective insulation material reflects the heat from the external environment. Such thermal insulation material does the same with the coolness, developed inside the room through the use of air conditioners. The coolness is reflected back inside to maintain the effect of the AC for longer periods of time.

Why Insulate?

- Insulations help to save energy bills.
- With insulations, houses and buildings will cooler in summer and warmer in winter.
- Approximately 33% of heat is lost through walls.
- Insulations help to reduce your carbon footprint and ultimately help environment.

## Exhibitor's Profile

### EMFORE CORPORATION

- **Countries**  
Products offered from more than 50 countries and territories.
- **Manufacturing**  
Major manufacturing facilities from Americas, Europe and Asia.
- **Engineering and Test Centers**  
Engineering facilities in the United States, Austria, Brazil, China, Czech Republic, France, Germany, Italy, Japan, Korea and Spain.

Emfore Corporation has received an “A” credit rating from analysts at “TRACE Anti Bribery Compliance Solutions”. The investment research firm’s “A” rating indicates that the company is a low default risk.

Emfore Corporation supplies high technology products and services to the building systems, hospitals and various other reputable businesses around the country.

Emfore Corporation sells, designs, makes and installs a variety of freight and passenger elevators for low-, medium- and high speed programs, as well as a line of moving walkways and escalators.

"People are taught to drive a car or take flights safely, but no such classes are given on how to ride an escalator, even though we ride on every day," said by our CEO, Mr. Muzaffar Husain Sufi a seasoned professional in the Elevator Industries adding that many children or even grown-ups may not know how to use elevators in a right way.

To improve public awareness of and knowledge in riding escalators safely, Emfore Corporation has developed a series of safety education campaigns nationwide since 1992, including publishing a safety book and rolling out Safe Rider Program under which Emfore Corporation’s employees are mobilized to volunteer and teach escalator safety at their own communities.

### OUR STRATEGY

#### PURPOSE

To become a leader amongst the agents providing elevators and escalators while maintaining our enhanced services, relationships and profitability.

Web : www.enggpost.com  
Cell : +92-321-4808788  
Contact Person : Zeeshan Haider  
Designation : Founder & Managing Editor

For Engineering Post, even sky is not the limit

Engineering Post is an elite engineering newspaper, covering all engineering sectors including contractors, consultants, architects, HVACR, electrical, automation, plumbing, builders, textile, sugar, cement, pharmaceutical and fertilizer industry with many more. We are the only publication with such a largest circulation all across Pakistan from north to south.

Founder and Managing Editor, Mr. Khawaja Zeeshan Haider, had been in the publication industry from more than 24 years. He is a business graduate from IBA, Punjab University and a hardworking, dynamic and enthusiastic business icon. Because of his management skills and novel ideas, Engineering Post in a short span has become the market leader in engineering publications with biggest ever advertising support from the engineering industry.

To bridge the gap between local and foreign players, Engineering Post is the only journal which has crossed the boundaries and started off with Middle East Electricity, Dubai, where we distribute the copies of Engineering post in order to promote the family of our advertisers among major players of the world. We were the official media partners of the recently held Middle East Electricity exhibition, Dubai. Engineering Post is the first ever engineering magazine from Pakistan which officially placed their stall in any engineering expo abroad i.e Middle East Electricity Dubai in March 2019. We are also the official media partners of ISK-Sodex Expo, Turkey, EP Shanghai, China, Middle East Electricity Saudi Arabia and Big 5 Dubai.

The Team matters the most. The Team Engineering Post comprises of the best human resource of the profession, a key element that took us to the no. 1 position in the industry.

In the last 12 months, we were successful in carrying out 3 record breaking supplements on IEEE Fair 2018, HVACR Expo and conference 2019 and Middle East Electricity Expo March 2019. Keeping the tradition, both supplements were record breaking as per number of pages and no of advertisers from all walks of industry. And still there is lot more on the way.

We believe in the kind of customer services where the customer/advertiser is promoted in so many different and unique ways that they should feel proud to be doing business with us. Therefore, we are the proud ambassadors of biggest no of engineering brands in Pakistan.

## **ENGRO POLYMER & CHEMICALS LIMITED (EPCL)**

12th Floor, Ocean Tower, G-3, Khayaban-e-Iqbal,  
Clifton Karachi

Phone : +92-21-111-411-411

Web : [www.engropolymer.com](http://www.engropolymer.com)

Facebook page : [www.facebook.com/EPCLCONNECT](https://www.facebook.com/EPCLCONNECT)

Engro Polymer & Chemicals Limited (EPCL) is the only fully integrated Chlor-Vinyl chemical complex in Pakistan. It is a subsidiary of Engro Corporation, involved in the manufacturing, marketing and distribution of quality Chlor-Vinyl allied products and Poly Vinyl Chloride (PVC).

PVC suspension resin is the primary product of Engro Polymer & Chemicals Ltd. Produced in a wide range of K-values: AU 58, AU 60, AU 72, AU 67R and AU 67S, it is used in the manufacturing of varied PVC based products. The different grades of resin offer a diverse range of properties that can be used in all the processing methods. PVC is the oldest and the most versatile of all polymers, is resistant to corrosion, weathering, impact and scratches, and acts as a superb electrical insulator. Cheaper than other plastics, it offers value at affordable cost, and is therefore one of the most widely used plastic materials in the world.

EPCL is actively involved in ensuring the sustainability of the domestic PVC industry, along with providing support through provision of quality products and technical services. New markets are continuously being tapped by its Business Development team for its product applications. All practices within the domain of the Company are ensured to comply with its Core Values of ethics, health, safety and environment on a constant basis. To meet growing demand and serve the market better, EPCL has planned expansion of 100k PVC resin which is expected to be online in 2020.

EPCL strongly endorses its triple bottom line philosophy in true essence – People, Planet and Profit are critical and indispensable elements for its growth and success.

Manufacture and use of tools make human beings have the chances to get more natural resources and create a brilliant civilization.

From the pyramids of ancient Egypt to the ancient Greek Parthenon; from the Coliseum in ancient Rome to China's Great Wall, stone has been integrated into our history for thousands of years, forming many fragments of ancient mankind civilization.

Today, the stone as a kind of building materials has been more widely applied to various areas of human life, which is an integral part of modern civilization. Wanlong has dedicated to stone cutting and stone application since 1993. Today, a daily average of 100,000 pieces of Wanlong diamond tools are exported around the world. Insisting on technological innovation, we continue to create more efficient and more cost-effective diamond tools. We have developed laminated stone panel. Our mission is bridging nature and human culture.

### **Indroduction Of Company**

M/S Bin Arif Industries Pvt. Ltd. was established in 2010 as industrial chemical manufacturer which are prime raw material for major industries like printing, painting, PVC, adhesives, etc. The company is engaged all the time putting its Endeavour to produce such productS which are nature friendly. This is being achieved by extensive efforts of our R&D wing led by C.O.O. of the company. With a new vision of PM Pakistan clean and green Pakistan, had given impetus to introduce this reinforced and composite green door and sheets technology. For the purpose we have acquired most modern customized State of the art technology and experienced staff and machinery and plant from abroad and local for production of Green Doors and Sheets. This shows our attitude to invest huge capital both money and human resources to help keep clean and green Pakistan. We therefore making all efforts to help Pakistan not to waste national exchequer again and again on the maintenance of the Public property and hence use the saved funds on the other projects of welfare and defense which is the need of the nation. How much we have succeeded which is quite evident that we are getting good response in the local market which is our biggest achievement. The idea to contact you (NESPAK) is to introduce this technology in the government departments in particular and civil as Vander.

### **Vision**

The process of translating an idea or invention into a good or service that creates value or for which customers will pay. To be called innovation, and idea must be replicable at an economical cost and must satisfy a specific need. Innovation involves deliberate application of information, imagination and initiative in deriving greater or different values from resources, and includes all processes by which new ideas are generated and converted into useful products. In business, innovation often results when ideas are applied by the company in order to further satisfy the needs and expectations of the customers.

Having vision/thirst of innovation and technology GREEN WOOD DOOR / SHEETS has introduce reinforced and composite wood doors/sheets first time in Pakistan that has brought luxury and comfort in life. These doors are made with a green material that makes the doors exceptional in beauty. Looking like natural wood these doors are cheaper, light weight and stronger than the doors of wood

## **Exhibitor's Profile**

### **GREEN DOORS**

and steel. It has no comparison in durability. Having resistance from weather effects like bulge, toxicities and termite, these doors provide mental satisfaction. Fire retardant property also makes it unique from others. It has life time guarantee. We manufacture the doors in standard sizes however it can also be customized. As we all know that everyday natural wood is being used for various purposes to maintain our daily life style and for many cases. Prime objective to bring Green Wood Door / Sheets in existence was to protect trees, greenery and eventually to protect our earth so that we can hand over a greener tomorrow to our successors and the climate is human friendly.

Biggest consumption of wood is for furniture's need at of our life style. Green Wood Door / Sheets were designed using eco-logical wastes using special extrusion process at high temperature. Finally the world has accepted Green Wood Door / Sheets as a perfect replacement for wood/plywood/boards or other form of wood.

#### **Mission**

To always bring forth an up-to-date and innovative product range.

To remain in sync with the constantly changing market trends.

To earn the trust of customers through our diverse product range and services.

To produce items which one for life time without disturbing nature.

#### **Values**

Quality | Honesty | Comfort | Sustainability | Less Cost

### **INTRODUCTION OF GREEN WOOD DOOR / SHEETS**

Green Wood Door / Sheets are nothing but reinforced wood which give life time comfort. It is the green climatic material which is being introduced for the first time in Pakistan. Looking much like natural wood, Green Wood Door / Sheets doors are extremely durable and absolutely water proof. These are highly appreciated used for interior decoration partition, preferable in kitchens and wet places such as washrooms.

### **QUALITIES OF GREEN WOOD DOOR / SHEETS**

This reinforced wood is light in weight but stronger than natural wood and steel. It gives resistance against heat up to 80C, coldness and wet conditions (water salinity) and pests. It is durable, unbreakable and has smooth surface which can be painted easily. It provides mental satisfaction once for all. It is cheaper than wood and steel. This material does not deteriorate and any design can be put on it. This can be used for the interior decorations or for partitions.

## **GREEN DOORS**

### **Specialities Green Doors**

Having vision/thirst of innovation and technology GREEN WOOD DOOR / SHEETS has introduced wood composite doors first time in Pakistan that has brought luxury and comfort in life. These doors are made with a green material that makes the doors exceptional in beauty. Looking like natural wood these doors are cheaper, light weight and strong than the doors of wood and steel. It has no comparison in durability. Having resistance from weather effects like swelling, toxicities and termite these doors are provide mental satisfaction. Fire retardant property also makes it unique from others. It has life time guarantee. We manufacture the doors in standard sizes however it can also be customized.

- It comes with water-dip guarantee

### HASAN ALLIED INDUSTRIES (PVT) LTD.

Starting out as a Builder, Developer, Contractor and Consultant, Hasan Associates has grown exponentially, pioneering not only construction but having played a vital role in the establishment of massive infrastructure projects such as South Asia's First Mobile Telecommunications Operator, Pakistan's largest IPP i.e. 586MW with the lowest tariff under the Power Policy of 1994, a vital Privatization and many other endeavours.

Hasan Cables strives to be synonymous with 'Top Quality Copper Cables'. Made with 99.9% pure copper, they are a long-term investment for our customers, ensuring that they can be embedded worry-free. An in-house furnace secures cable purity & durability, and the on-site laboratory meticulously tests our products' safety & performance, ensuring our belief of 'quality first' is always met.

Hasan Cables has the ability to manufacture a complete range of general and power cables, including aluminum. Our machinery is geared to be able to cater to not only the retail market, but also the enormous demands of DISCOS and corporate institutions, while adhering to international standards. We provide free consultation and a completely customized solution catered to your power needs. By identifying exactly what your requirements are, we can save your costs whilst reducing energy inefficiencies. We believe every client is a long-term partner, and it is this philosophy that has allowed Hasan Cables to provide to all major organizations. At Hasan Cables quality can never be compromised; today, tomorrow and beyond.

No challenge is insurmountable for us, and having played a vital part in ushering in Pakistan into the modern era - we now turn towards creating the future.

Cell : +92-300-2818892

### Introduction

The Hazari Group is a family business that extends across three generations and is synonymous with quality and excellence in the Pakistani business and wholesale distributor's community. Coming up to its 100th anniversary, the history dates back to 1918 when M.IBRAHIMJEE JAFFEEJEE HAZARI established a small Paint Shop in the heart of the city of Karachi, Pakistan. Since then, the Hazari Group has grown in a sustainable and consistent manner with all members, Eldest Son MR. HATIM M IBRAHIMJI HAZARI joined in 1959 and continued developed the paint business by the name of M. Ibrahimji Hazari & Son's contributing to its growth and upholding the core values of integrity, quality and excellence in customer service. The hardware and sealants line of the business expanded and grew in 1978 by the name of Hazari hardware & Tools Mart under the leadership MR.FAKHRUDDIN HATIM HAZARI-The Great Grandson of the Founder. The Hazari Group also successfully added the Import Department to the Group The legacy of innovation and entrepreneurship continued when in 1999 MR. HUSAIN FAKHRUDDIN HAZARI being the eldest Grandson of the 3rd Generation family joined the business and worked diligently to introduce leading consumer and industrial brands to the portfolio. This effort and hard work culminated in the Hazari Impex being the distributors for COLEMAN and CAMPINGAZ for Pakistan. New products are continually added, and the growth of these brands has set it apart from competitors as the leading consumer and industrial goods distributors in Pakistan. Staying on the growth trajectory, the Hazari Impex embraced the digital revolution and under the young and creative leadership of MR. MUKARRAM FAKHRUDDIN HAZARI, the second grandson of the 3rd Generation family re-launched its website (www.hazari.com.pk), launched its online store and began social and digital marketing to engage and sell to its consumers. Dedicated to evolving continuously and working with quality products, the Hazari Impex is the leading distributor for prestigious, globally recognized consumer and industrial brands. Today, the Group operates out of Bolton Market, an area that is the quintessential center of the wholesale business and trading hub in Karachi. The core values of the business remain the same as multiple generations of the Hazari family continue to work effortlessly and collaboratively to maintain the legacy and to innovate and grow the business.

Web : www.arserwood.com

Contact Person : Xu Xuewen

Stall No(s) : B77 B78

Product Line : Plywood,MDF,Blockboard

Jiangsu High Hope Arser Co.,Ltd - Subsidiary of Jiangsu High Hope International Group: Located in Nanjing, Jiangsu Province, as a leading state-owned foreign trade enterprise, High Hope Arser started its plywood export business in 1990s with its original name "YAFEI", later renamed as "ARSER" in 2005. In April 2007 Skyrun Arser was founded as a joint venture with Jiangsu Skyrun Group. In May 2012 Skyrun Group reorganized with High Hope Group according to Jiangsu provincial government documents , finally we renamed as Jiangsu High Hope Arser Co.,Ltd via registration and approval by Jiangsu provincial Bureau of Industry and Commerce.

For quite a long time, under the business philosophy of Specialization, branding and characteristic, High Hope Arser specializes in both export & import business for wood building materials. Arser export includes various plywoods, fancy products, film faced plywood, blockboard, MDF, melamine faced products, MDO,etc; Arser import includes Indonesian Falcata barecore, Canadian lumbers (SPF), North-American hardwoods/European Red pine, African & Russian logs,etc.Wooden pallet is also developed as a new product from 2016 for local and export sales.

Depending on well-controlled product quality, stable supply, excellent transportation system and good after-sales service, High Hope Arser established solid cooperation with customers from Europe &America, Middle East, Asia, North Africa, totally over 70 countries and regions with more and more market share. Our total export & import value exceeds 3 hundred million US dollar annually, in 2018 our wood-panle export value reached 2.1hundred million US dollar, both value & volume ranked the first place of TOP100 List of Chinese Forest Products Export Enterprises (plywood & multilayered wood flooring), which is published by FPI (China Forest Product Index) based on Customs statistics, all these bring us to the leading position in China's wood-based panel industry. Besides, we are entitled as Sample Enterprise of Export trade by General Administration of Customs, the first trading company achieved AEO Advanced Certification Enterprise, which is applied and approved by Nanjing customs in

## **JIANGSU HIGH HOPE ARSER CO.,LTD**

Jiangsu province. We also won the Outstanding Contribution Award of the 3rd China Forest Industry.

In addition, High Hope Arser registered series of brands with “ARSER-” & “ARSER WOOD” in over 10 countries, both trademarks are awarded as Jiangsu Famous Export Brand. Together with our branch factories, we also obtained ISO9001:2008, ISO14001 : 2004 , OHSAS18001 : 2007 , CE, FSC®, Q-Mark certificates.

To ensure professional quality control and win customers’ trust as well as long term cooperation, we specially set up export QC Departments in Linyi, Pizhou, Shuyang and southern parts of China. For domestic markets, we also built marketing center for imported commodity in Shanghai, Tianjin, Qingdao, Jiangsu Taicang and Zhejiang Jiashan,etc.

Along all the years, High Hope Arser always remain committed to our customers, and continuing to select partners, ensure qualified products and stable supply, as well as related international trade services for our factories.

Product Line : Melamine paper; Melamine board; UV board; Edge banding

Liamax was founded in 2000, it has 20 years history. We have four main products: melamine paper, melamine board, UV board and edge banding.

We impregnated paper by ourselves, now we have 6 impregnated lines, 5 lines are 4 feet and 1 line is 8 feet. Our impregnated machines are all IMACO. There are 70% color designs are brought from Europe, such as Lamigraf, Schattdecor and IP. The other 30% colors are designed by our own design team, we will design some original colors. Now we already have thousands of color designs.

We have MFC, MDF, MFP. The size of board we made is 4\*8 feet and 4\*9 feet. Our company has 20 press machines now and more than 150 surface texture, and some steel plates are imported from Hueck in Germany.

UV board also called high glossy board, this is our company's new product, but some clients already brought from us, such as Thailand and Australia. We are also going to launch the super matt board at next year's interzum.

We also have our own edge banding company, we can match the board to make the edge banding directly, there are two kinds of materials: PVC and ABS.

Profiles

Lakhani Group Of Companies carries an experience of 35 years in the glass, pharmaceuticals, packaging and health-care industries, and is a well-respected name in the global markets.

Lakhani proudly presents Pakistan's first jumbo sized, fully automatic, double forced convection tempering furnace. Lakhani Glass is a premium processor of superior quality glass, oversized insulating and safety glazing. Our maximum sizes are not only visually impressive but possess amazing economies; large panes save on elaborate framing, cut down on erection time and in the final analysis, save costs.

Premium quality and bigger formats of up to 20 feet in commercial production are a unique combination, which has helped Lakhani pave the way for a new era in the glass industry to the benefit of architects, clients, facade contractors and installers. The high degree of automation on Lakhani production lines guarantees our customers the utmost reliability, paramount calculability, and reliable deadlines.

Product Line : Power and Distribution; Cement

With 20,000 tons per day of grey cement & 14,000 tons per month of white cement Maple Leaf Cement Factory Limited stands as Pakistan's largest single unit cement manufacturer.

The Green Maple Leaf has been our identity since 1960. It embodies a product that brings International standards engineered to transcend the tough market conditions of Pakistan. Maple Leaf continues to live this legacy, even decades after its birth. We continue to dominate the local and International markets, wherever present.

We are committed towards running an efficient business by investing in our people, improving our resources and embracing cutting-edge technologies.

Maple Leaf Cement has two separate plants for Grey and White Cement; each with dedicated production lines within the same facility that ensure a continuous supply of cement 24/7 – 330 days a year.

We have kept ourselves abreast of global improvements in the cement manufacturing technologies and processes. Staying true to our mantra of technological excellence, Maple Leaf Cement underwent an expansion plan in 2007 to set up a state of the art fuel efficient dry process plant based on the FLSmidth\* technology. This facility has allowed Maple Leaf Cement to increase its production capacity to approximately 4 million tons annually.

FLSmidth is a global engineering company based in Copenhagen, Denmark which is a leading provider of one-source cement production plants worldwide and has a presence in more than 40 countries.

We, Noon International (Pvt.) Ltd., being the Exclusive Representatives of M/s. KAESER KOMPRESSOREN, GERMANY would like to introduce KAESER as 2nd largest Screw Air Compressor manufacturer in the world, who are providing Compressors and Compressed Air Systems with 90 years of experience, having state-of-the-art production facility located in Coburg, Germany.

Kaeser's comprehensive range of products comprises of Stationary Compressors as well as PORTABLE COMPRESSORS, which ensures that every compressed air user finds a right solution that meets one's own exact requirements.

The Kaeser plant in Coburg produces powerful Portable MOBILAIR Compressors with advanced, fuel-saving motors and heavy-duty chassis in a wide range of models, from the smallest portable units to large compressors. Many models feature a Moulded PE Enclosure (tension-free for extreme dent resistance).

Kaeser offers modernized 100% Made & Assembled in Germany Compressors, powerful and efficient with the World-Renowned SIGMA PROFILE.

#### Portable Compressors:

- with Flow rate 1.2 to 34.0 m<sup>3</sup>/min (42 - 1200 cfm)
- Patented Anti-Frost Control
- Large-dimensioned coolers

**NOON INTERNATIONAL (PVT) LTD. /  
KAESER KOMPRESSOREN SE**

- Protected exhaust pipe
- Separate air filters for engine & compressor
- Protection against corrosion
- SIGMA-profile, low air end speed
- Automatic Monitoring & Shutdown (Optional)

**Stationary Compressors:**

- with Flow rate 0.26 to 86 m<sup>3</sup>/min
- 12 – 15% of Annual Turnover being spent on R & D annually.
- Kaeser offers Direct 1 : 1 Drive (Motor RPM = Rotor / Screw RPM) Energy Efficient Screw Compressors.
- Kaeser 1 : 1 Drive Compressors saves 6 – 8 % Energy compared to competitors Gear Driven & Belt Driven Units.
- Highly Efficient Air Cooling System as per our Ambient Conditions.
- Kaeser provides you Compressed Air Packages.
- Fastest Growing German Screw Compressor in Pakistan.
- More than 1000 Compressors sold over the last 10 Years in Pakistan.
- Professional , Prompt & Reliable After Sales Support.

#### INTRODUCTION

Nova Engineering Enterprises was established in 1993, as an engineering component manufacturing unit, and in 1995, we expanded our scope of work to construction field, and we worked with an Italian firm M/S Impregellio, working on Ghazi Barotha Dam Project, under the name of GBC.

In Year 2003, we were contacted by PERINI CORPORATION INC. a US firm doing security upgrade works at US Embassy in Islamabad.

With PERINI we carried out several projects for security upgrade works within the Embassy premises and also Library of Congress and Narcotics Affairs Section, located in Islamabad, we remained associated with Perini Corp. till the end of their project.

In Year 2004, RAO section of US Embassy awarded us an turnkey project for establishing an Containerized housing and affiliated facilities at Shamsi Air Base, our scope of work included ground preparation, gray water and sewerage water disposal, fresh water supply and electrification of entire project, the project was completed within time and to the utmost satisfaction of the Contracting Officers Technical Rep. (COTR).

With RAO we have been working since 2004 till date on several projects , in Northern areas of Pakistan (Wana, MirAli, Bannu, Miran Shah, Timmergirah and Peshawar)all of these projects were on turnkey basis.

We have carried out several key projects with ODRP, namely in Terbela, Attock and Ghazi Airbase and remain associated with them till date.

Presently we are working with B.L. Harbert, main Contractors for US Embassy extension project.

We manufacture EPS Insulated Sandwich Panels for roof and wall for housing/warehouses/ Schools/hospitals etc. most suitable for seismic zones and also manufacture steel "Z" Purlins on automatic plant.

Our Works area is on 2 Acres of land with several covered sheds and open areas for large fabrication items.

Stall No(s) : E-135, E-136, E-137 AND E-160, E161, E162

Product Line : Rockwool, Light Weight Wall Partition, Pre-Engineered Building Solutions, Cold & Hot Insulation

Pakistan Insulation (Pvt) Ltd, was established in 1986 as a manufacturing company dedicated for improving thermal efficiency in the country. Our mission was and has been throughout to promote the cause of energy conservancy in the period of history witnessing ever rising energy costs. Our initial product was Rockwool with which we have insulated most of the industries in Pakistan. It still remains as the prime material of choice for thermal and acoustic insulation all the country.

In order to take our goals to a newer level Pakistan Insulation (Pvt) Ltd now offers energy efficient Pre-Engineered Buildings. The buildings offered by us are quick to construct, durable, well insulated and above all economical.

The buildings are built using prime material on the state of the art automated plant located in Port-Qasim, Karachi. Each building offered by us benefits from the rich experience of the company in terms of thermal and acoustic insulation.

Our highly proficient sales team handles proposals for your inquiries with the utmost dedication. All offers are submitted with proposed drawings and competitive quote.

Pre-Engineered buildings offered by us can be used as warehouse, factory buildings, super markets, aircraft hangers, exhibition halls, car parks, as well as residential buildings.

We can also offer you structural steel structures in addition to buildings. These structures can be used in industrial setups as platforms and also as components for multi story structures.

## **PAKISTAN INSULATION (PVT) LTD**

### **PRE ENGINEERED STEEL BUILDING:**

A cost-efficient alternative to conventional building design in commercial applications is the pre-engineered metal building system. Metal buildings consist of a structural steel framing system, supporting a metal roofing system and the wall panels of varying materials.

### **LIGHT GAUGE STEEL STRUCTURE:**

Light gauge steel construction is very similar to wood framed construction in principle - the wooden framing members are replaced with thin steel sections. The steel sections used here are called cold formed sections, meaning that the sections are formed, or given shape at room temperature.

### **COLD STORAGE:**

Cold storage is basically a term used for refrigerated or frozen storage facilities, usually used to store food or pharmaceuticals. "Cold storage" could be something as small as a walk-in cooler or freezer (defined by CA as 2,000 sq ft or less) or a 200,000 sq ft warehouse.

### **PU FOR COLD INSULATION:**

Polyurethane is formed by mixing an isocyanate, such as methylene diphenyl diisocyanate (MDI) with a polyol blend. These components are mixed to form a rigid, cellular foam matrix. The resulting material is an extremely lightweight polymer with superior insulating properties.

It has good thermal insulating properties, low moisture-vapor permeability, and high resistance to water absorption, relatively high mechanical strength and low density.

### **ROCKWOOL FOR HOT INSULATION:**

Rock wool insulation provides thermal and sound insulation and can be used as a fire stop between floors. ROCKWOOL insulation is made from naturally fire resistant volcanic diabase (stone). Created using the same process that occurs at the heart of a volcano, ROCKWOOL stone wool tolerates temperatures of up to 1000° C and will not burn.

**Resin Bonded Rockwool:** World class Fire rated rockwool boards. Used in both cold and hot insulation, resin bonded rockwool has high thermal, chemical and heat resistance with an unmatched dimensional stability.

#### GOVERNMENT OF PAKISTAN MINISTRY OF INDUSTRIES & PRODUCTION

PASDEC was established in 2006 under section 42 of company's ordinance 1984 as a subsidiary of Pakistan Industrial Development Corporation (PIDC), working under the auspices of the Ministry of Industries and Production for the development of Marble and Granite Sector of Pakistan.

#### Functions of PASDEC:

The Company's core function is to develop the dimensional stone industry of Pakistan, which is being carried out by introduction of latest mechanized machinery (Machinery Pools), development of quarries, establishment of state of the art Marble Cities/Industrial Estate and Common Facility & Training Centers/Warehouses along with the skill development to overcome the skilled workforce deficit of the industry.

#### Core Objectives:

The core objectives of the company are as follow:

- To promote, develop and up-graduate dimensional stone sector
- Enhance technical capabilities of the stone sector
- Demonstration of latest quarrying and processing techniques
- Establish model quarries and training institutes
- Extraction of dimensional stone square blocks
- Establishment of Common facility center, Warehouses and Marble cities in potential marble and granite clusters.

## **PAKISTAN STONE DEVELOPMENT COMPANY (PASDEC)**

### **Overall Performance:**

PASDEC has achieved the target of introduction of latest quarrying techniques, technology and skill development in the sector. The wastage at the mechanized quarries developed by PASDEC has been considerably reduced. Due to the demonstration effect created by PASDEC, the mine owners are shifting towards mechanized quarrying in the country. The Company has also established 15 mechanized quarries, 2 Machinery Pools and 1 Marble City. Besides this, the Company has trained more than 605 operators on mechanized mining, 1,262 females on mosaic, inlay and handicraft to cater for skill development need of sector in collaboration with the donor agencies.

SANY Group is a global company in the construction machinery industry with range of concrete machinery, excavator, hoisting machinery, pile driving machinery, road construction machinery, port machinery, and wind turbine. SANY began in 1989 as a small welding material factory. Now it has grown into a global corporation with five industrial parks in China and four R&D and manufacturing bases in America, Germany, India and Brazil. SANY became the unique company listed among the world's top 500 companies in China's construction machinery industry. Each year, SANY Group re-invests 5-7% of its sales revenue into the R&D, making it possible to expand its product lines to concrete, road, port, hoisting, pile driving, excavating machineries and wind energy products. Now as one of the most successful enterprises in China, SANY becomes one of the global top construction manufacturers. SANY has shown that there is no limit for SANY in concrete pumping technology. With its unique advantages, SANY is striving to help build a better world.

Apex Machinery (pvt) Limited is the authorized dealer of SANY Products in Pakistan.

Shafisons Engineering (Pvt.) Ltd. (SSEPL) created ripples in the field of engineering plastics by the launch of brand, "BETA PIPES" in 1994. Our business activities are focused on the development, manufacturing and distribution of plastic piping systems and solutions.

Shafisons Engineering (Pvt.) Ltd. has its head office and manufacturing plant located in Lahore with regional offices in Islamabad and Multan. Our entire management is committed to the motto of "Service and Quality" where customer driven approach is demonstrated by providing quality products and services. We feel proud to revolutionise the pipe industry in Pakistan by replacing traditional metallic and concrete systems with Plastic Pipes. At SSEPL, we manufacture multiple piping systems for various applications mainly utilising three different materials, Polyvinyl Chloride (PVC), Polypropylene Random Copolymer (PPRC) and High Density Polyethylene (PE-100). Our product range covers PVC-U and PE-100 Pressure Pipes for cold potable water supply applications, PVC Electrical Conduit System, PVC-U Soil, Waste & Vent (SWV) pipes and fittings, PPRC pipes and fittings for above-ground hot and cold water supply applications. Our 'Customer Care' department offers a variety of services including technical support, design proposals and estimates, customized tools and techniques to provide an ultimate customer experience.

### **The University**

National rankings, environmentally friendly and state-of-the-art facilities, growing reputation for excellence in teaching and affordable cost of engineering education are some of the main attractions of SSUET.

Its hallmark includes the curricula emphasizing on research, the air conditioned class rooms and labs meeting international standards, sports facilities, symposia and seminars, Continuing Education Programs, strict adherence to Teaching Schedules, sound interaction between Industry and Academia, ongoing research projects and above all the Career Planning & Placement Bureau, which helps find jobs for the alumni.

### **History**

#### **SOURCE OF INSPIRATION**

Sir Syed University of Engineering & Technology is spiritually associated to Aligarh Muslim University, Aligarh, India. The role of Aligarh Muslim University, in the process of uplift and wellbeing of the Muslims of the subcontinent, stands in bold relief in the annals of history. The domain of working of this university was not confined to teaching of some subjects or dissemination of knowledge; it rather transcended these spheres and encompassed the building of character and development of personality of the students along with academics.

This university works in accordance with a philosophy that was the driving force for Aligarh Movement. This philosophy was initiated by Sir Syed Ahmad Khan and developed by relentless work by his associates and followers. The Movement was remarkably universal and abiding in its appeal and applicability.

Its essence was education as the prime mover of modernization, progress and development. It put great emphasis on keeping intact the community's own distinctive cultural identity and base. The Movement gave equal importance to character building along with scholastic instruction.

## **Exhibitor's Profile**

### **SIR SYED UNIVERSITY**

The real outcome of Aligarh movement was the Aligarh Spirit, which was being inculcated in every student, through the special pedagogy and instructional methods, during studies at the Muslim University and this spirit distinguished its students. The alumni of the Muslim University, with Aligarh spirit as their characteristic, played distinctive role in whatever position they happened to have in the practical life, after education. Every student even after education at Aligarh derived, from the Aligarh Spirit, the zeal and enthusiasm for doing formidable tasks and materializing great ideas.

#### **Vision**

"SSUET vision is to meet the demands of challenging times as envisioned by Sir Syed Ahmed Khan by transforming Pakistan into a Knowledge based society through social impact projects and innovation in education, research and creativity, endeavoring to create an entrepreneurial mindset."

#### **Mission**

"To play a leading role as an outstanding University with focus on engineering, technology, science & business education for national socio-economic development and meeting the challenges of modern times by creating alliances and partnerships among academia, industry and communities. To focus on innovation, research and commercialization imbued with a sense of social & moral responsibility aligned with Aligarh spirit."

Yuwang Waterproof Building Material Group Co., Ltd

Yuwang group(YWG) is the manufacturer which is specialized in waterproof building materials. It was founded in 1985 with a registered capital of 100 million RMB, and had imported Spanish, Italian technology and equipment, producing domestic first volume of modified bitumen waterproof membrane and initiating a precedent in modified bitumen waterproof membrane industry. Trough years of technical research, continuous equipment improvement and upgrading, now we have 14 production lines of modified asphalt waterproof membrane, 9 sets of wide high polymer production devices, 18 sets of waterproof coating devices and 4 sets of polyester non-woven fiber production devices. Annual production capacity includes 140 million square meters modified bitumen membrane , 45 million square meters of polymer sheet, 120 thousand ton waterproof coating, 10 million square meters of asphalt shingles, 20 thousand ton of polyester non-woven fiber production.

Till now Yuwang group owns 6 waterproof material production base, including Liaoning, Hubei, Anhui, Sichuan, Guangdong and Northwest district as well as Yuwang Fiber raw material production base.

Production sales volume and brand market share of Yuwang have been in the forefront for many years. We have 32 marketing branches companies and more than 700 dealers. The marketing network covers 32 provinces, municipalities and autonomous regions throughout the country. The products have been successfully applied to waterproofing projects in roofing, underground, tunnel, corridor, subway, high speed railway, road, bridge, water conservancy and environmental protection. Yuwang products have played an important role especially in Hong Kong-Zhuhai-Macao Bridge, the Haikou Twin Towers, the Tiananmen Reviewing Stand renovation, the National Stadium(the Bird's Nest), the Capital Airport, the Nanjing Subway, the Wuhan-Guangzhou express railway and other national major projects.
