

The logo for the 16th Build Asia International Exhibition & Conferences. It features the text "16th Build Asia" in a large, bold, blue font. The "16th" is in a smaller font size above "Build". The word "Build" is in a very large, bold, blue font. The word "Asia" is in a white font with a blue outline, positioned below "Build". A yellow crane is positioned above the "16th" and "Build" text. A white grid pattern, resembling a building facade, is positioned behind the "Build" text. Below "Asia" is the text "International Exhibition & Conferences" in a smaller, black font.

Quaid-e-Azam Muhammad Ali Jinnah **Father of Nation** **Unity Faith Discipline**

If Pakistan is to play its proper role in the world to which its size, manpower and resources entitle it it must develop industrial potential side by side with its agriculture and give its economy and industrial basis. By industrializing our State, we shall decrease our dependence on the outside world for necessities of life; we will give more employment to our people and will also increase the resources of the state.

On the occasion of laying the foundation-stone of the building of the Valika Textile Mills Ltd. on 26th September, 1947 www.quaid.gov.pk/speech08.htm

Azad Properties is a one-stop shop for investors in the Turkish Real Estate Market, including property filtering, viewing, evaluating and executing sales and purchase contracts. Azad represents the largest and most well respected property developers including Nef, AvrupaKonutlari, Sinpas and Emaar. Importantly, they are one of the few companies that also enable foreign investors to enter the local secondary market, guiding investors through this process to make the choice suited to their needs.

Azad also provides Turkish Citizenship and Residence consultancy to foreigners through the investor program with their inhouse legal team.

Azad has vertically integrated its business on both ends of the spectrum. Through its sister concern Azad Builders, they specialize in renovating old and heritage properties, demolishing old buildings to build new ones. Through Azad Homes the investors are able to manage their properties on short and long term contracts. This includes independent units and boutique hotels. Azad Properties is a subsidiary of Azad Brothers that also owns Azad Tours, a destination management company and Azat Films, a leading Film Production House.

Azad aims to excel customer service, grow client capital and exceed investor expectations. Their mission is to build trust and create bonds that last forever.

DEVELOPING SUSTAINABLE COMMUNITIES FOR PAKISTAN

TPL REIT Management Company Limited (TPL RMC), established in 2019, is the leading provider of REIT management services in Pakistan and is regulated by the SECP. TPL RMC is a 100% owned subsidiary of TPL Properties Limited (TPLP) and was established to capitalize on the sustainable real estate development and management expertise of its parent company.

TPL RMC launched its first fund, REIT Fund I, the Sustainable Development Fund, which is a portfolio of diverse real estate asset classes in Pakistan, all targeting to be LEED Certified. The mission of the Fund is to decarbonize Pakistan's cities through sustainable and climate focused developments, supporting technology ecosystems, heritage, and the environment. The projects aim to uplift living standards and address the shortfall in commercial and residential properties due to rapid urbanization in Pakistan.

TPL RMC's foreign subsidiary, TPL Investment Management (TPL IM), is the fund manager registered in the Abu Dhabi Global Market operating with a 3c fund manager license.

Build Con

ABOUT US

Company Overview

Build Con is specialized in the supply of top-quality building materials and contracting works with a primary focus in the MEP, Firefighting and HVAC sectors. Our unique position in the market enables us to generate synergies which enables us to provide unparalleled end-to-end solutions to our valued clients. Whether you have a specialty project or require a turnkey solution, our company can deliver a versatile range of services to address each step of the process. From initial planning through supply, construction and commissioning we provide the confidence and assurance to exceed customer expectations.

Build Con is the exclusive agent and distributor of Hepworth products in Pakistan, an industry leader in the production of plastic pipes and fittings. Build Con is also partnered with other leading global brands in the areas of Firefighting, Steam Management, Noise & Vibration Control, Metering and various Steel products to name a few. Build Con has worked in numerous prestigious projects across Pakistan in the residential, commercial, industrial and Strategic sectors to deliver superior results fulfilling the client's needs above and beyond their satisfaction. Through a fully-fledged trading activity with both local and international partners along with a robust supply chain network, Build Con is able to provide turnkey solutions to its valued clients.

Through the combined capabilities of our Contracting & Building Material Supply Divisions, we have the knowledge and expertise to successfully deliver projects while ensuring compliance with the various specifications and regulatory requirements, significantly reducing the plan review and approval cycle. Our leaders enable us to meet the critical process demands of our customers by successfully completing projects in a cost-effective and timely manner. Our Professional Engineers in the areas of facilities engineering, planning and execution as well as in regulatory and environment issues instill confidence and assurance for complete customer satisfaction.

MSA, first established in 1976 as a **design firm** by the name Midhat Siddiqui Associates, is a premier design-build company, registered in C-1 with PEC. The company has constructed 35 prestressed concrete bridges in Northern Pakistan on 'turnkey' basis. Since 2008, MSA has been offering state-of-the-art **structural design, fabrication and construction** services, under the brand DURABUILD, in prefabricated Cold Formed Steel (CFS) buildings to valued clients, including Aga Khan Education Services. The multistory buildings are designed for extreme seismic, wind and snow loads, as required by the project location.

With our strong background in Structural Engineering, we assure you of safe, durable, economical and aesthetic CFS structures that are light weight, quick to construct, and which will bring you savings in energy and maintenance cost.

MSA also offers light weight extension of existing buildings, interior partitions and exterior curtain walls of high rise buildings. Visit us at www.durabuild.pk

Their rich experience and the desire for growth of Pakistan's Economy led them to invest significantly in modern technology and machines, so as to ensure consistent high quality products and quick response to market demand.

Euro Gulf Industries (Pvt.) Ltd. is one of the leading Polymer Pipe & Fitting Manufacturer in Pakistan. It specializes in manufacturing PPR-C, uPVC, PE & cPVC Pipes & Fittings. Its facility is the only of its kind in Pakistan which manufactures all four types of Pipes & Fittings under one roof. It manufactures pipe ranging from 16 mm to 630 mm and also manufactures more than 150 different kind of fittings. Its products are supplied all over Pakistan. The lower diameter pipe (i.e. 1/2" to 8") is usually used & supplied to the commercial market and its higher diameter pipe (i.e. 6" onwards) and PE pipes are supplied and used in government, semi-government and special projects.

Besides uPVC resin which is purchased from Engro Polymer, the sole manufacturer in Pakistan, all its Raw Material is imported from the most renowned companies in the world such as Tasnee, Sabic and Borouge. The company gives utmost importance to its quality. For this reason alone, **Euro Gulf Industries (Pvt.) Ltd.** is among the only few companies in Pakistan who has an in-house laboratory, equipped with the latest gadgets to ensure quality to the last inch.

Apart from its 150 9001-2015 Certification it is certified by PCSIR, PSQCA and Pakistan Engineering Council. It is also registered in different government and semi-government departments. It manages its own Distribution System to ensure availability of its product all over Pakistan.

LINE OF BUSINESS

1. Pre-fabricated steel composite sandwiched panel Houses, Offices, Hospitals, Dispensaries, Warehouses, Congregation halls, Recreation halls, Barracks both military and non military application and solutions for vast other applications.
2. Passenger elevators for domestic and residential use.
3. Air Ports Baggage Handling System (B.H.S.) Design, Fabrication & Installation.
4. Design & manufacturing of customized machinery for wide range of industries.
5. Support services for large mechanical and civil contractors in the shape of providing engineered solutions such as batching plants, cement silos, heated asphalt storage tanks, pressure vessels, oil storage tanks etc.

PRODUCT LINE

PortaHome Prefabricated cabins & houses, FabSpan Pre-engineered Buildings, MiniLift Domestic passenger elevators, Jumborella, FabLift scissor type hydraulic work platforms, Rapiform quick erect type scaffolding, Airport baggage handling System, Polar Shelters BTS shelters for Telecom, FabLite mobile lighting towers, Trailer mounted bitumen heating tanks etc. etc.

FABRICON (PVT.) LIMITED.

BRIEF PROFILE

Fabrics Pvt Ltd is a premier mechanical engineering company in Pakistan & was established in the year 1976, over the years the Co. has developed some very innovative products for local and overseas markets. Fabrics has in the last 15 years developed specialized machinery & equipment to manufacture light gauge steel (LGS) Pre-engineered buildings for various application. Our product Fabcad Building system is being widely used to construct houses, offices, hospitals, recreational building, schools, clinics & roof top extensions. We are capable to provide complete housing solution & can also provide this technology & machinery such as computer controlled cold forming light gauge steel 'C' channels to make complete house assembly kits.

FABRICON PVT LTD. / STORK CONSTRUCTION

The other product which has very wide acceptability & is being used quite extensively all over the country are our mini passenger elevators. This is a complete factory assembled passenger elevator which can be installed in private banglows, apartment, offices etc for personal use. This is driven by 1HP & 2HP single phase electric motors this can be operated in case of power failure by small gasoline/gas 4 KW power generators. The elevators are available upto G+4 applications.

Other import substitution products are on development stage & will be offered to customers as soon as they are ready for the market.

Customers are highly encouraged to contact us for their specialized requirement for which we will give special attention to develop locally.

Talking about the pre-engineered structure, UPVC sheets made by Gondal Group of Industries are the best solution especially for both roofing and walls. UPVC external cladding is the best roofing solution for both industrial and residential purposes. UPVC roofing sheet has worldwide domination over all other roofing and external wall products as there is no paramount choice when build dairy farm shed due to alkaline environment or when you decide to build galvanizing unit resisting acids such as Hydrochloric acid. Our PVC Corrugated sheet/PVC Corrugated Profile has diminished the use of cancer causing asbestos sheets by meeting superior physical properties and world class green building requirements. PC sheets (Polycarbonate panels) are not very resistant to scratching, marring, and abrasive surfaces. As a result, denting is possible on the surface if care is not taken. High price is one of the major disadvantages of polycarbonate panels since it is much more expensive than our UPVC transparent and translucent sheets. Fiberglass being somewhat thermal resistant has many disadvantages being expensive, needs maintenance, condensation resulting in due drops and breaking/deforming on impact due to poor flexibility. UPVC on the other hand provide the flexibility by absorbing energy from impact. The mechanism of chemical attack on thermoplastics in general, and our UPVC sheets in particular, differs significantly from the mechanism of corrosion of metals. Corrosion of metals results in a gradual loss of surface material as a result of electrolytic action by the relevant chemicals. Chemical attack on UPVC sheet has negligible effect on physical properties due to its high chemical resistance. In electroplating or chemical industry CGI Sheet (Corrugated Galvanized Iron/Steel sheet) like all metals and materials will corrode, galvanizing will tear eventually, and this can occur more quickly in situations where it might be exposed to the acidic or alkaline actions frequently. Even as rain or salt water can do the damage over time so it won't be a wise choice if you want the best roofing solution for your project. Our premium quality UPVC sheets come in a wide variety of colors and thicknesses. Colored UPVC are ideal for all types of structures and roofing. Whether you choose transparent, translucent, or opaque colors, there is no limit to what you can do with this versatile product.

Guard Filters is pioneer in auto filters & engine oil manufacturing in Pakistan since 1948 founded by Late Mr. Shafi Malik (Sitar-e-Imtiaz). Guard Filters own one of the biggest filter manufacturing plants in East Asia. We are ISO 9001-2015 and 14001-2015 certified company and committed to provide our customers with quality products at most competitive prices within specified shipping schedule.

We dedicate over 75 years of filtration experience to our customers; in the general industry segment, Guard Filters offers the most comprehensive global manufacturing capabilities in the air filtration industry, and each facility is specifically designed to manufacture and test the most complex clean air solutions. Additionally, each facility manufactures to the appropriate international quality and performance standards. Our goal is excellence in each product we make. Our corporate quality policy best states the Guard Filters commitment. Customer satisfaction and continuous improvement are our highest priorities. Product quality cannot and will not be compromised.

One of the big challenges facing society today is safeguarding the cleanliness of air and liquids. Innovative solutions are called for and Guard Filtration Technologies has the answers. We develop solutions that make processes more efficient, save resources and protect our environment, thereby raising the quality of life.

We also have extensive knowledge of the food industry: Seed (Rice, Cotton & Vegetables). Lubricants & Oils: Automotive engine and transmission oils, Hydraulic oils, Brake oil, Engine coolants, Greases and HEPA/HVAC Filters.

KAMRAN STEEL
 Shaping the Future

“The steel industry is the foundation industry of any economy especially in developing countries whose material amount is likely to increase significantly in the future for infrastructure investment and growth in the manufacturing sector”.

Kamran Steel has put its first facility in 1984, with our hard work and honesty I have seen our company grow by bounds. Our company has led the Pakistan Steel industry as a pacemaker in understanding and implementing state of the art technology and machinery into steel making. In the period of 32 years Kamran steel has contributed in making a better Pakistan, being one of the fastest growing countries. As our mission statement clearly states that Kamran steel believes in honesty and integrity are the essentials ingredients of a strong and stable enterprise. With this providing customers with high quality, strong steel products through research and development, and state of the art technology.

1. About us/Company Profile

Kamran steel has been in the steel industry for more than 3 decades, started as a steel trader. The first small steel mill came to place in 1984 with the name of Senior steel (partnership). Now the Kamran Steel is one of the leading manufactures of steel with multidimensional activities from making billets of Mild Steel, Spring Steel, Deformed bar/ Re-reinforcement bar, Wire rod and a huge range of sections such as I-Beam, H-Beam, T-bar/T-Section.

Our company consists of state of the art fully automatic rolling mill with production capacity of 250tonn per hour which turns into an annual production of 100 000 metric ton. High gradation of automation enables us to produce high and consistent quality of steel bars which is according to the international standards. In order to provide customers with the highest quality steel, the company is equipped with experience, dedication, technical knowledge and an extensive approach to steel making that emphasizes it priority of serving the nation. The company has large expanded operations which are headed under.

Group of steel Industries

- Kamran Steel Re-Rolling Mill
- Punjab Concast (PVT) LTD
- Progressive Steel Industries (PVT) LTD
- T.A Corporation (PVT) LTD

2. Vision & Mission

The vision of Kamran steel is to be a leading steel producer of Pakistan and be recognized at a national level. While focusing on primary business and explore new opportunities, remaining ethically and socially responsible.

Mission: Kamran Steel believes honesty and integrity are the essentials ingredients of a strong and stable enterprise.

Our mission is to establish a system that's supports are employees

Work in the favor of our shareholders in order to maximize profits.

To provide customers with high quality, strong steel products through research and development, and state of the art technology. Our mission is becoming the market leader of the steel industry.

Product Line: HD PUTTY, WALL COAT, WHITE CEMENT, GERY CEMENT

Maple Leaf Cement Factory Limited (MLCFL) was incorporated in Pakistan on 13 April 1956 under the Companies Act, 1913 (now the Companies Act, 2017) as a public company limited by shares. The Company is listed on Pakistan Stock Exchange. The cement factory is located at Iskanderabad District Mianwali in the province of Punjab. The principal activity of the Company is production and sale of cement. The Company is a subsidiary of Kohinoor Textile Mills Limited (“the Holding Company”).

Maple Leaf Cement has recently introduced first ever cement based wall putty with the name “hd putty” in the market which is a paint product. Specializing in the structure especially the formulation of wall base, wall putty was a natural next step for us. Building on the aesthetics of whiteness and cementitious properties, we introduced hdpatty in the market. The concept of hdpatty is backed up by superior whiteness, advanced adhesion and water repelling capabilities owing to its organic bonding of white cement with grey cement plastered walls and the presence of advanced German polymers.

PAKISTAN INSULATIONS

Company Profile:

Pakistan Insulation (Pvt.) Ltd is the pioneer and leading manufacturing company of Rockwool. Established in 1986, it was dedicated to improve thermal efficiency and the conservation of energy in Pakistan and neighboring countries.

Rockwool, Pakistan Insulation (PVT.) LTD initial product helped insulate most of the industries in Pakistan. It still remains the prime material of choice for thermal and acoustic insulation across the country. In a period of history witnessing ever rising energy costs, Pakistan Insulation (PVT.) LTD maintained the mission to promote the cause of energy conservancy.

To take these goals to a newer level, the company now offers energy efficient pre-engineered buildings (PEB), light gauge steel structure (LGSS) and cold chain solution (CCS)

Our Products:

•INSULATIONS :

- 1) Rockwool Blankets
- 2) Rockwool Rigid Boards
- 3) Rockwool Pre formed Pipe Covers
- 4) Loose Wool
- 5) Resinated Light Rockwool Blanket (RLR)

•PANELS :

We Are Sika

Sika AG, Switzerland. is a globally active specialty chemicals company. Sika supplies the building and construction industry as well as manufacturing industries (automotive, bus, truck, rail, solar and wind power plants, faades). Sika is a leader in processing materials used in sealing, bonding, damping, reinforcing and protecting loadbearing structures.

Sika's product lines feature highquality concrete

admixtures , specialty mortars, sealants and adhesives, damping and reinforcing materials, structural strengthening systems, industrial flooring as well as roofing and waterproofing systems.

SIKA PAKISTAN

Sika Pakistan (Pvt) Limited is a subsidiary of Sika AG - Switzerland and started its operations in 2010 on 100th anniversary of Sika worldwide.

With an aim to become number one construction chemical company in Pakistan, Sika Pakistan opened its head office in Lahore with regional offices in Karachi, Islamabad and Faisalabad. Simultaneously, Sika Pakistan also launched its manufacturing facility in Lahore during the first year of the start of operations in Pakistan to facilitate its customer needs.

MISSION STATEMENT

To be the partner of first choice for customers and suppliers, ensuring leadership position in the market where we compete delivering long-term business values through a high performance culture, innovation, ethics and responsible care. With strong mission, courage for innovation, strength to persist and pleasure of working together, Sika Pakistan aims to target diversified construction and industrial markets such as:

- Concrete production
- Elastic sealing and bonding
- Waterproofing
- Roofing systems
- Flooring systems
- Refurbishment and Strengthening
- Industrial manufacturing (primarily motor vehicle construction)

Çolakoğlu Yapı, founded in İstanbul Bahçelievler in 1961, has been growing steadily in the construction sector for more than half a century. As Çolakoğlu Group, we have achieved our targets when compared to 2015 thanks to the fact that all of our incorporated companies are in the construction sector.

Our manufacturing companies within the structure of Çolakoğlu Group are; Silkcoat Boya, Çolakoğlu Beton, Çolakoğlu İnşaat and Anadolu Mikronize.

Silkcoat which was established in 1993 and operating with the Group, started its manufacturing activities with silk plaster, then has become a company exporting to 62 countries by adding mineral plaster, construction paints, synthetic paints, varnishes, decorative exterior wall coatings, effect interior paints and Silkoterm Exterior Thermal Insulation System in its manufacturing activity.

Silkcoat today continues to produce quality products for the world paint market with its facilities in İstanbul, Uzbekistan, Ghana, Mauritania, Iraq, Algeria, Nigeria, Ethiopia, Malaysia, Tajikistan, Tanzania, Sierra Leone, Pakistan and Gine. As our target until 2023, we intend to contribute to Turkish economy and reach our well-deserved place by making production in 15 facilities in the world.

Çolakoğlu Group entering ready-mixed concrete sector with the name Çolakoğlu Beton, put 400.000 m³/year capacity ready-mixed concrete facility into customers' service in 2007 in Kiraz.

Turkey's biggest calcite facility in single mill with capacity of 300.000 tons/year, Anadolu Mikronize which is our subsidiary began production in 2008 in Nigde.

Çolakoğlu İnşaat, has been serving in various cities for villas, business centers and housing construction for nearly 20 years, has now offered VADİŞEHİR and MOSTARLIFE projects in Başakşehir to our people..

As Çolakoğlu Yapı, we continue our construction materials (concrete, iron, brick, cement, sand, gravel, plaster, ytong, bims, paint, jacketing, ceramic, armature, construction chemicals, etc.) wholesale which started in 1961 and we increase our target every day.

Stall No(s).....: HALL-2 ½ B101, B102

Product Line: MANUFACTURER OF M.S , G.I PIPE OR UPVC , CPVC PIPE & FITTINGS

Company Profile

STEELEX the leading manufacturers of M.S and G.I pipes in the country was established in 1979 along with the distribution networks all across Pakistan. It was not long that it became the largest tax-paying unit of the country and was enlisted among the top-selling brands of Pakistan.

As innovation has always been our motto, we took a step further and started manufacturing UPVC and CPVC pipes and fittings in 2011. Every kind of robust and state of the art machinery was imported in the country to produce the best product in the market. As a result, today we are the most prominent business in Engro Polymer consuming PVC resin for pipes and fittings locally.

Another milestone achieved is that, Steelex is the only manufacturing company that has collaboration with international brands like Liansu / Lesso group China, Innovyn Belgium and Lubrizol Belgium (the one and only licensed manufacturer for CPVC pipes and fittings in Pakistan). It retains the highest spot in the manufacturing industry and has proved to be the top brand of Pakistan winning the FPCCI brand of the year award consecutively from 2008 till 2018. Additionally, we are an essential part of PAK/China and PAK/Malaysia trade committees.

Products:

As Steelex has dominated the manufacturing of MS GI & PVC piping systems, it is one of its kind industries that cater to a wide range of pipe manufacturing.

Our products include:

- M.S
- C.R Tube
- Scaffolds
- G.I Pipe
- U-PVC pipes and fittings
- CPVC pipes and fittings

Mission:

The company's firm belief; "The Difference is Quality" is evident in all products and every person associated with the company has constantly strived to prove it and build trust among the clients.

STEELEX PVT LIMITED

Vision:

Our vision is to provide the finest quality products in every domain whether it is domestic or commercial. Steelex has proved to be par excellence and with its future business strategies will continue to do so.

Strada Imaging (Pvt) Ltd is a company that designs and produces cutting-edge hardware and software products for the construction and transportation sectors. Strada Imaging was formed in 2019 after 10 years of industry-focused research jointly by the co-founders with European and US companies. Strada has more than 120 years of joint expertise in technologies such as computer vision, AI, software engineering, sensors, and robotics together with deep sectoral experience in construction and transportation infrastructure maintenance. Enabled by its multidisciplinary team, Strada Imaging has developed highly innovative products to facilitate pavement scanning, construction snagging, asset detection, and much more. Strada Imaging has operations in both South Asia and Europe, where it has its key client base built over decades of industry partnership and collaboration.

ALUMINIUM
FOR THE PERFECT FINISH

Swisstek Aluminium is one of the leading commercial and industrial Aluminium extrusion profile manufacturers in Sri Lanka. Our products are Green labelled and the process is certified in SLS 1410:2011, ISO 9001:2015, ISO 14001:2015 and ISO 50001:2018/2019. At Swisstek Aluminium, we engineer value-added aluminium products using only the most premium quality billets made of virgin metals imported from UAE and Middle East countries. We are a Jotun-approved applicator and proudly became First Qualicoat Certified Organization in Sri Lanka. We offer a wide range of surface finishes such as Wood finish, Powder coating, Anodizing, and mill finish with a wide range of colours in each finish. Our technology, advanced craftsmanship and unwavering passion, establish our plant as more of an artisanal workshop, than a well-equipped manufacturing plant. As a very dynamic profile maker meeting all the international standards, Swisstek Aluminium has become an exclusive supplier of multiple profiles in multiple finishes for many brands around the Globe including the USA, Europe, Australia Maldives etc.

Product Line: THERMAL INSULATION MATERIALS

SYMBOL INDUSTRIES (PVT) LTD (YEAR OF ESTABLISHMENT: 2005)

Symbol Industries (Pvt.) Ltd was incorporated under the Companies Ordinance, 1984 on 19th May, 2005. The company is located at Sundar Industrial Estate Plots # 481-490, Sundar Raiwind Road Lahore and is engaged in the business of manufacturing insulation material which is known as XPS Insulation Board. It is worth mentioning that the company has produced this XPS product first time in Pakistan. The plant is installed in the factory based on 90% imported machinery and 100% of imported raw materials.

Management of the company is highly professional and experienced. The directors belong to the business and industrial circles of the country and enjoy a very good reputation. They are also professionally competent to undertake the whole operation & success of the project. The directors and management, belonging to this company have a track record of successes in the operations of a number of projects. The companies which they are presently controlling are being managed efficiently and profitably.

Diamond Jumbolon (XPS Insulation) Board Manufacturing Plant

The XPS Insulation Board Plant is imported from Korea. The plant is installed for producing Extruded Polystyrene Insulation Sheets. It is worth mentioning here that by the grace of God we are pioneer to produce XPS product in Pakistan. The production capacity of plant is 3000 to 3500 ton per annum. The commercial production has started instantly after its installation. The sister concern of the company M/ S. Capital Ind. Enterprises (Pvt) Ltd. is already producing an insulation material with the brand name of "Diamond Jumbolon Sheets/Rolls". The management has a vast experience of the sale of such kind of insulation, water proofing and heat proofing materials. The market of insulation material has already been established in Pakistan by our sister concern.

Energy Conservation Needs in Pakistan

Electricity consumption in Pakistan has been growing at a fast rate of more than 13% annually. As a result, electrical utilities have not been able to keep up with the fast growth of electricity consumption, which has led to widespread load shedding. The residential sector consumes 40%, industrial 25%, commercial 25% and agricultural sector 10% of the electricity produced. A careful estimate shown that in buildings, we consume 50% of the energy for heating and cooling by air conditioners and heaters. An air conditioner of 1.5 tons consumes 3 units of electricity in an hour and if the consumer uses the AC for 6 hours a day, this will cost Rs. 3,700/- (approx.), per month. During long and harsh summers, we use an AC for unlimited hours on a high thermostat, due to which, our energy bill shoots up to an alarming extent. The climate of our country provides a good setting for energy efficient techniques. This offers an important component to the solution of Pakistan's serious energy problem. Energy efficient design or energy conservation in general offers a great possibility for significant saving of energy. One major mean of energy saving is to ensure that buildings should be well insulated which allows occupants to be comfortable with minimum energy consumption.

With changing life style and increased cost of living, now it should be our first priority to insulate our houses for improves thermal comfort, durability and economy. XPS Foam Board Insulation sheets, when used in roofs and walls, virtually stop heat transfer to nearly zero.

H.C.E. is an Italian leader in the production of truck cranes, at worldwide level among the companies operating in this specific sector. H.C.E. began its activity in 1980 in Castelnovo di Sotto (Reggio Emilia - Italy); since 2000 the registered trademark holder is located in the new factory at Poviglio (Reggio Emilia).

As an emerging company, H.C.E. specialized the production of hydraulic cranes. Soon after, owing to its entrepreneurial capacity, H.C.E. has been able to establish a truly qualified group, unique in Italy as to articulation, productive strength and technological innovation.

Presently the H.C.E. group includes seven companies, suitably interfaced but still preserving their own operational independence.

The respect of the environment and the personnel safety is one major concern of H.C.E.; to this purpose impressive investments have been made in equipment that aim at damping the polluting agents and reducing risks.

H.C.E. has always accepted the market challenges and counted on innovation and quality, by giving space to new forces and young ideas inside the company.

Apex Machinery is authorized dealer in Pakistan.

Product Line: SCISSOR LIFT, TELESCOPIC BOOM LIFT, ARTICULATING BOOM LIFT, SPIDER LIFT

Founded on 28th February, 2008, Hunan SINOBOOM Heavy Industry Co., Ltd. is situated in Changsha, China. It is engaged in research, development, manufacturing, sale and service of aerial work equipment. There are five series: self-propelled articulated boom lift, self-propelled telescopic boom lift, self-propelled scissor lift, spider lift and truck-mounted boom lift. The products are selling well in China and overseas e.g. Southeast Asia, Australia, Middle East, South America and Europe.

The company is member of IPAF (International Powered Access Federation) and China Engineering Machinery Association. In 2010, SINOBOOM was listed as one of key enterprises under four RMB100-billion industrial clusters (for equipment manufacturing) supported by the government. SINOBOOM has certification of Australian AS, European CE and Russian GOST.

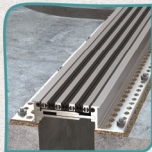

There is wide spread use in ship building and repairing construction, civil engineering, electric power, communications, gardening, advertising, venues and stadiums, airport, harbor and various large factories and mines.

Vision decides height, height determines strength. With "Integrity brings business, Science makes progress", we are looking forward to cooperate with friends from all walks of life.
